The origins of the Border Reivers can be traced back to the 13th century, when the border between England and Scotland was a fluid and contested area. The Reivers were often the descendants of families who had been displaced by war or famine, and they eked out a living by raiding the farms and villages of their neighbors.

The Reivers were organized into clans, each of which was led by a chief. The clans were often at war with each other, and they also fought against the English and Scottish governments. The Reivers were skilled horsemen and archers, and they were known for their ruthlessness and brutality.

The Reivers' raids were often extremely destructive. They would burn houses, steal cattle, and kidnap people for ransom. The Reivers also had a reputation for cruelty, and they often killed their victims without mercy.

The English and Scottish governments tried to suppress the Border Reivers, but they were largely unsuccessful. The Reivers were too well-organized and too mobile to be easily caught, and they had the support of the local population.

In the 17th century, the power of the Border Reivers began to decline. The English and Scottish governments finally managed to establish control over the border region, and the Reivers were no longer able to operate with impunity.
